---

Developing in a way that improves lives and positively influences others is what inspires me to work efficiently. I describe myself as a dynamic & ambitious developer who loves coding, and enjoys to solve a problem, seeking a challenging position in a reputable organization to expand and utilize my learning, skills and extensive knowledge.

## EXPERIENCE

AUGUST 2021 – NOVEMBER 2022

**SOFTWARE DEVELOPER**, MITH & MITHSON PVT LTD.

- Build cross platform flutter app with firebase and AWS backend and integrated various third-party services such as 2-Factor Authentication, google maps and payments, etc.
- Known for good debugging skills, I always worked on challenging problem solving and have been able to analyze code with attention to details.
- Contributed software engineering expertise in the development of app using various IDE's like Android Studio, VS code, PyCharm, and other IntelliJ IDE's, etc.

## EDUCATION

AUGUST 2019 – MAY 2022

**BACHELOR'S DEGREE IN COMPUTER SCIENCE**, K J SOMAIYA COLLEGE

Passed with **9.52 overall CGPA (Distinction)** and attended various riidl workshops and Facebook circle meetup events of AI, ML and software development which exposed me to new tech stacks, enhanced my problem solving skills and abilities in learning different technologies.

## PROJECTS

**DECENTRALIZED FILE STORAGE WEB 3 APP**

A Blockchain file hosting service which enables users to share and sync their files over decentralized app using solidity smart contracts and ganache web3.
